

Following this advice all year round can save you up to £350 per year.

- Using your central heating properly will cost less than using individual electric heaters.
- Use thicker curtains instead of blinds, especially in the winter.
- Don't cover your radiators as this blocks heat.
- Close your curtains as it starts to go dusk to keep in the heat.
- Switch off lights and appliances when not in use.
- Chargers use energy when they are connected to an appliance so unplug them.
